PROFILE

A driven developer with experience in building scalable applications and exploring security-focused solutions. Combines problem-solving skills with a practical approach to create efficient, user-friendly systems. Passionate about learning, adapting to new technologies, and developing solutions that are both functional and dependable.

EDUCATION

NSS College of Engineering <i>Bachelor of Technology in Computer Science</i> Percentage: 70.6	Palakkad, Kerala Aug. 2023 – May 2027
Our Own English High School <i>Grade XII</i>	Sharjah, UAE Aug. 2014 – May 2023

EXPERIENCE

Graphic Designer & Consultant — <i>Freelance & Campus Projects</i> <i>NSS college of engineering</i> - Delivered professional visual assets and branding for external and institutional clients using Photoshop, Illustrator, Figma and Canva. - Organized and conducted an intensive 7 hour Photoshop workshop under ISTE for 40+ students, managing curriculum development and technical instruction.	January 2022 – Present Palakkad
--	------------------------------------

PROJECTS

Feesible <i>A Flutter app for educators to manage students, attendance, and payments.</i> Developed a Flutter (Dart) mobile application using Firebase Firestore for real-time data synchronization, offline storage, and optimized performance for 1,000+ users.	March 2026
Mosaic <i>A retail analytics platform for tracking customer flow and behavior in stores.</i> Built a React-based data analytics dashboard using FastAPI and PostgreSQL, applying K-Means clustering and LLaMA (Grok API) for shopper behavior analysis and predictive insights.	April 2026
Logix <i>An enterprise SIEM platform for real-time security detection and incident management.</i> Developed a Python-based SIEM tool for log aggregation, real-time monitoring, and anomaly detection, enabling security event analysis and threat identification.	March 2026
Homelab <i>A self-hosted Linux server environment for containerized applications and secure remote access.</i> Architected a headless Ubuntu Server using Docker to orchestrate containerized services, implementing a Tailscale Mesh VPN to bypass restrictive networks and enable secure, zero-trust remote administration.	May 2026

EXTRA-CURRICULARS

Dedsec <i>CTF</i> Secured a Top-10 Finalist position in the CTF, maintaining a high-ranking standing throughout an intensive overnight technical sprint. Solved advanced crypto, web, and forensic challenges.	March 2026
